

SHINING LINE

SHINING LINE

Depigmentation and whitening treatment. Corrects spots, lightens and evens tone.

Symptoms of the pigmentation disorders

The alteration in pigmentation may be caused by different internal triggers (the result of ageing), or external triggers, such as ultraviolet light, hormonal changes such as pregnancy, trauma or inflammation in the skin, which can produce a stimulating effect on the melanocytes. Overproduced in some areas, melanin is accumulated in these areas causing slight changes in the skin tone, or spots.

Modifications

- Inflammatory processes due to an increase of the cellular oxidation.
- Alteration in pigmentation due to an excess of melanin deposits.
- Disruption of the organization and hyperkeratinization skin stratum corneum.

Consequences

- Fragil skin, sensitive, olive and devitalized.
- Thickening of the stratum corneus and uneven tone.
- Pigment accumulation by excess or irregular distribution of melanin.

Main synergy

W SYNERGY COMPLEX

The synergy between **Arbutin + Kojic Acid + Glabridin** forms a complex that inhibits the synthesis of melanin in the skin by blocking the enzyme tyrosinase, which gives depigmentation properties to this exceptional synergy. It works by reducing and preventing spots at epidermal level.

1

Repairs the skin in depth and protects it against the triggers of the excess of pigmentation.

2

The dermal architecture is reorganized, and gradually the spots diminish and skin tone is evened out.

3

Reduces and eradicates spots of epidermal origin, visibly and effectively.

Symptoms

Anubis solution

<p>1 OXIDATIVE STRESS AND CELL DAMAGE</p> <p>Progressive skin damage and premature ageing. Acceleration of the inflammatory process of the skin and vascular fragility. Dehydration, tightness, flaking and redness of the skin.</p>	<p>BETAGLUCANS</p> <p>VITAMIN C</p> <p>ALOE VERA</p>	<p>ANTIOXIDANT PROTECTION</p> <p>Prevent oxidative damage through its antioxidant and soothing properties. Repair skin in depth, protecting it from external aggressions.</p>
<p>2 THICKENING OF THE STRATUM CORNEUM</p> <p>Thickening of the stratum corneum by accumulation of dead cells. Increase of transepidermal water loss. Change of the appearance, texture and skin tone.</p>	<p>AHAs</p> <p>SALICYLIC ACID</p>	<p>CELL OXYGENATION</p> <p>Whitening effect or attenuator of spots thanks to the keratolytic action of the acids, which produce a progressive cell replacement and regulation of keratinisation in epidermis.</p>
<p>3 HYPERPIGMENTATION</p> <p>Stimulation of melanogenesis process. Excess of formation and irregular distribution of melanin. Uneven tone and blotchy skin.</p>	<p>ARBUTIN</p> <p>KOJIC ACID</p> <p>GLABRIDIN</p>	<p>WHITENING AND DEPIGMENTING EFFECT</p> <p>Powerful depigmenting effect thanks to the action of its whitening actives that act at cellular level by inhibiting the tyrosinase enzyme and blocking melanin production.</p>

Protocol of the line

Cosmetic indications

- Hyperpigmentated skins.
- Skins prone to blemishes.
- Olive and dull skins with uneven tone.
- Post-acne marks.
- Asphyxiated skins.
- To illuminate the skin on special occasions.

Duration and regularity

- Time per session: 1 hour.
- Intensive treatment: 8 sessions, 2 per week.
- Maintenance treatment: 2 sessions per month.
- It is recommended to realize a previous session of preparation with the "NEW EVEN" treatment.

Use with equipment

- The Shining Line treatment contains AHAs and other acids, which means that all those equipments, whose function is to enhance the penetration of the product, will be contraindicated.
- In case of having ozone therapy, the suitable time to use it, will be after the mask.

Precautions

- Do not use during pregnancy and lactation.
- Do not use other exfoliating products or dermabrasion at the same time, neither during the three days following the treatment.
- Do not use other treatments containing retinoic acid, phenol, salicylic acid, or hydroxy acids for at least 7 days.
- Do not realize this treatment if the person has begun UV tanning sessions during the last 7 days.
- This treatment contains AHAs and can make your skin more sensitive to sunlight. It is advised to avoid direct exposure (including artificial tanning) during the 7 days following treatment.

1 Cleansing and toning

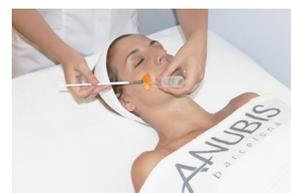

- Apply VITAL LINE MAKE-UP REMOVER EYES AND LIPS using cottons or swabs making circular motion. Remove with water.
- Apply NEW EVEN CLEANSING GEL to face and neck. Work until makeup traces and impurities are eliminated. Remove with water.
- Apply NEW EVEN TONIFYING LOTION vaporizing or using moistened cotton.

**2** Exfoliation SHINING LINE COMBINED PEEL

- **SHINING LINE Pre peel.** Pour the content of an ampoule in a bowl. Apply it with a cotton or gauze over face with dragging movement. Leave it to dry without removing the product.
- **SHINING LINE Peel.** Pour the content of an ampoule in a bowl. Apply it using a fan brush to face, neck and neckline. Start the application over the thickest areas of the face counting the exposure time from the start of the application. Exposure time: *See "exposure times depending on skin type" in the box or the technical sheet of the product (see in this dossier).
- **SHINING LINE Off peel.** To neutralise the peeling, apply a small amount of product (hazelnut size). Apply it using a fan brush to face, neck and neckline. Leave it on from 1 to 3 minutes and remove with water.
- Apply NEW EVEN CLEANSING GEL to face and neck. Work until makeup traces and impurities are eliminated. Remove with water.
- Apply NEW EVEN TONIFYING LOTION vaporising or using moistened cotton.

**3** Concentrate and massage

- Apply WHITENING mela5 CONCENTRATE to face, neck and neckline, using 1/2 vial and working with light tapping until completely absorbed.
- Apply WHITENING K SERUM to face, neck and neckline with a gentle massage, with special emphasis on the most pigmented areas. Work it until its complete absorption.

**4** Mask

- With a brush, apply WHITENING K MASK to face, neck and neckline. If required, work hyperpigmented areas to improve penetration.
- Leave it on for 15-20 minutes. Remove with water.
- Apply NEW EVEN TONIFYING LOTION vaporising or using moistened cotton.

**5** Finalisation

- To treat the area around the eyes and lips, we recommend the application of VITAL EYES CONTOUR LINE.
- Apply WHITENING CREAM to face and neck with a gentle massage until completely absorbed.

For more information about the products used in the protocol that are not part of the SHINING LINE:
VITAL LINE MAKEUP REMOVER and VITAL LINE EYES CONTOUR: see the line "VITAL LINE".

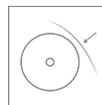

NEW EVEN CLEANSING GEL and NEW EVEN TONIFYING LOTION: see the line "NEW EVEN".

W SYNERGY COMPLEX Solution

Main active ingredients

Uva Ursi Extract (Arbutin, Bearberry)	Arbutin is a hydroquinone derivative known for its skin lightening properties. This active effectively inhibits the activity of tyrosinase, the enzyme that catalyzes the production of melanin in the skin.
Yarrow extract	Healing and soothing properties are attributed to this plant. One of the plant extracts is rich in luteolin and, for this reason, it is indicated for the treatment of skin hyperpigmentation.

Specifications

MINERAL OILS FREE

Skin type

- For all type of skins, specially:
 - Hyperpigmentated skins
 - Skins prone to spots
 - Olive and dull skins with uneven tone
 - Post-acne spots
 - Asphyxiated skins

Results

Emulsion with intensive effect, with light texture and rapid absorption. Thanks to its actives, its main property is to inhibit the synthesis of melanin by blocking the tyrosinase enzyme, reducing and preventing blemishes at epidermal level, and it also has a soothing and healing activity, which helps to correct skin irregularities while evens the tone.

How to use

- **Use at home:** Apply to face and neck with a gentle circular motion massage until completely absorbed.

Equipment

Not required.

Frequency of use

- **Use at home:** Due to its light texture it can be used daily, in the morning before applying the cream and/or evening after applying the concentrate, for a full depigmenting treatment.

Precautions

Have not been described.

Product SHINING LINE
Whitening Cream

Format 60 ml. 20 ml.

Description Depigmenting whitening cream

Reference 15020060 / 15100005 (CABIN PACK WHITENING K RADIANCE)

Main active ingredients

Uva Ursi Extract (Arbutin, Bearberry)	Arbutin is a hydroquinone derivative known for its skin lightening properties. This active effectively inhibits the activity of tyrosinase, the enzyme that catalyzes the production of melanin in the skin.
Kojic Acid Dipalmitate	Has the excellent ability of inhibit tyrosinase activity in order to decrease the formation of melanin. It is more effective than pure kojic acid. With kojic acid dipalmitate, it obtains excellent results in skin tone as well as in general disorders of skin pigmentation.
Aloe Vera Gel	With moisturising, nourishing and softening properties thanks its ability to retain water due to its richness in mucilage. Its mineral and vitamin content makes it especially useful in the fight against skin ageing. Repairs skin in depth, which makes it particularly effective in the case of devitalised and damaged skin. Glycoproteins and gamma-linolenic acid confer it calming properties, fundamental to alleviate the effects of skin irritation.
Salicylic Acid	Keratolytic agent that acts upon the removal of dead cells in the stratum corneum, reducing the corneocitary cohesion and inducing rejection of dead skin cells. Currently, it is accepted that the exfoliating action of salicylic acid undergoes decementation action (dissolution of the intercellular cement) and inhibition of cholesterol sulfotransferase activity. Salicylic acid also reduces the pH of the stratum corneum thus increasing skin hydration and favoring its keratolytic activity.
PCA Sodium	Component of the moisture factor of the skin, its concentration decreases with age. Helps to increase skin smoothness by improving moisture retention.

Technical sheet

Product **SHINING LINE**
Whitening Roll-On

Format

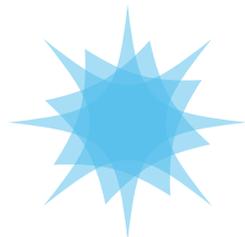

10 ml.

Description Depigmenting and dark spot corrector

Reference

15030010

Main active ingredients

Kojic Acid	Has the ability to inhibit tyrosinase activity in order to brake the formation of melanin. Kojic acid can produce excellent effects in all type of general pigmentation disorders of the skin
Licorice (Glycyrrhiza Glabra Root Extract)	Glabridin is the main compound of the hydrophobic fraction of licorice extracts and it is used for its clarifying properties. Glabridin inhibits melanogenesis by inhibiting T1 and T3 isoenzymes of tyrosinase, and also inhibits the inflammatory response by blocking the cyclooxygenase and preventing the formation of free radicals such as superoxide anions.
Lactic Acid	Lactic acid is an alpha hydroxy acid that is extracted from the milk. The importance of this ingredient resides in its ability to exfoliate and moisturise the skin. By removing the layers of dead cells, the skin gets a healthier texture and a healthier appearance. Lactic acid exfoliates the skin without attacking or irritating. Increases the hydration of the corneum layer, improves the overall texture of the skin and helps to reduce wrinkles.

Whitening K Mask

Format 20 ml.

50ml.

Description Depigmenting lightening mask

Reference 15130020 / 15100005 (WHITENING K RADIANCE CABIN PACK)

Main active ingredients

Uva Ursi Extract (Arbutin, Gayuba)	Arbutin is a hydroquinone derivative known for its skin lightening properties. This active effectively inhibits the activity of tyrosinase, the enzyme that catalyzes the production of melanin in the skin.
Kojic Acid Dipalmitate	Has the excellent ability of inhibit tyrosinase activity in order to decrease the formation of melanin. It is more effective than pure kojic acid. With kojic acid dipalmitate, it obtains excellent results in skin tone as well as in general disorders of skin pigmentation.
Glabridin (Glycyrrhiza Glabra Root Extract)	Glabridin is the main compound of the hydrophobic fraction of licorice extracts and it is used for its clarifying properties. Glabridin decreases melanogenesis by inhibition of tyrosinase and thus inhibits the inflammatory response by blocking the cyclooxygenase and preventing the formation of free radicals such as superoxide anions.
Encapsulated Vitamin C (Ascorbic Acid)	Antioxidant properties to reverse the effects of free radicals. Essential for the biosynthesis of collagen, acts as a cofactor for prolyhydroxylase and it is a stimulus for collagen's gene expression.
Betaglucans	They can prevent oxidative damage through their antioxidant and soothing properties. Accelerate cellular regeneration and repair skin in depth, protecting it from external aggressions.
Malic Acid	Gentle alpha-hydroxy acid that has properties to renovate and improve skin condition. Due to its relatively large molecular structure, malic acid penetrates less into the skin, more slowly and evenly, causing less irritation. It is best known for its keratolytic and mild exfoliating action and for giving the skin an even tone and reducing hyperpigmentation.
Shea Butter	Moisturising and emollient large capacity, protecting the skin and stimulating the production of structural proteins by specialized skin cells. Contains antioxidants that have limited capacity to absorb solar radiation. With properties to reduce inflammation of the skin and prevent premature ageing.
Kaolin	Natural clay with excellent absorption capacity, cleans the skin from the excess of fatty residue and from impurities.

Specifications

PARABEN FREE / MINERAL OILS FREE

Skin type	Results
<ul style="list-style-type: none"> • For all type of skins, specially: <ul style="list-style-type: none"> - Hyperpigmentated skins - Skins prone to spots - Olive and dull skins with uneven tone - Post-acne spots - Asphyxiated skins 	Whitening and illuminating mask with pleasant texture. With effective skin lightening actives that act synergistically, effectively inhibits the activity of melanogenesis. Stimulates collagen synthesis, protects against oxidation and free radicals reversing the adverse effects from them. Gives the skin a soothing and softening, moisturising and emollient effect, accelerating cell regeneration and mitigating premature ageing by inhibiting enzymes that degrade skin proteins.

How to use	Frequency of use	Equipment
<ul style="list-style-type: none"> • Professional use: Apply with a brush and leave it on for 20 min. Remove with damp sponges in water. Due its special texture, it is recommended to massage during the exposure time to facilitate penetration of the actives. • Home use: With clean and toned skin, apply the mask to face and neck, leave it on for 20 minutes. Remove with water. 	<ul style="list-style-type: none"> • Professional use: In the cabin treatment, twice a week. • Home use: We recommend twice a week. 	Not suitable for devices.

Product SHINING LINE
Whitening mela5 Concentrate

Description Depigmenting whitening concentrate

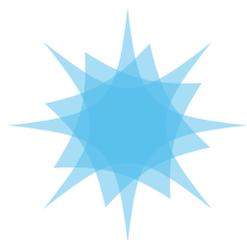

Format

6 amp. x 5 ml.

Reference

15100006

Main active ingredients

Melavoid®

Complex of active ingredients extracted from the root of the plant Boerhavia Diffusa. With a target effect, decreases the formation and activity of the tyrosinase enzyme and melanin synthesis without affecting the viability of melanocytes. Diminishes skin tonality in a homogeneous and uniform way. Reduces the number and intensity of the spots of the various types of hyperpigmentation.

Niacinamida®

Known as vitamin B3. It is a multifunctional ingredient that reduces the creation of spots. Renews the cells of the most superficial part of the skin, providing a great luminosity. Prevents the appearance of expression lines and wrinkles. Strengthens the skin's natural defenses to maintain hydration. Avoids the processes that lead to yellow and pale skin. Reduces the visibility of pores.

Skin type	Results
<ul style="list-style-type: none"> • For all type of skins, specially: • Hyperpigmentated skins • Skins prone to spots • Olive and dull skins with uneven tone • Post-acne spots • Asphyxiated skins 	<p>Gel-like concentrate with Melavoid® and Niacinamide®. With a target effect, it acts on the process of melanin synthesis formation, reducing the number and intensity of spots. Lightens the skin tone in a homogeneous and uniform way, giving it luminosity. It also prevents the appearance of fine lines and wrinkles, reduces the visibility of pores and strengthens the skin's natural defences to maintain its hydration.</p>

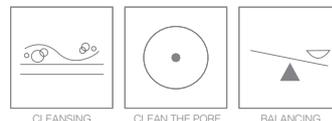

How to use	Equipment	Frequency of use	Precautions
<ul style="list-style-type: none"> • Professional use: In the cabin treatment. Not required.	<ul style="list-style-type: none"> • Professional use: In the cabin treatment, as renovator depigmentating treatment, twice a week. 	It is not recommended for the most reactive and sensitive skin. Do not use during pregnancy and lactation.

Technical sheet

Product SHINING LINE COMBINED PEEL
1. Whitening Pre Peel

Format

8u. x 3 ml.

Description Pre- peeling solution

Reference

15150003 (COMBINED PEEL CABINPACK)

Main active ingredients

Acetone	Colorless chemical compound with characteristic odor that can be found in the nature. It is a degreaser active due to its solubilising action against fat.
Lemon Essential Oil	In order to preserve the majority of qualities and properties, the lemon essential oil is extracted from the cold-pressed from the peel of fresh lemons. Softens and brightens the skin and has antiseptic and detoxifying properties among many others. With decongestant properties, helps to prepare the skin for the next step.
Orange Blossom Water	The orange blossom water is obtained after distillation in steam stream of the infusion of petals of orange blossom flower of the bitter orange (<i>Citrus aurantium</i>). With invigorating and refreshing effect, protects the skin from free radicals preventing cellular ageing and helping to preserve the hydrolipidic mantle, at the same time that degreases the skin.

Specifications

MINERAL OILS FREE

Skin type

Indicated for all skin types that require to prepare the stratum corneum for the peeling.

Results

Astringent solution of external use based on orange blossom water and lemon essential oil. Progressively decreases the pH of the skin, avoiding possible reactions. Cleans and prepares the skin, removing superficial oil layer, improving the effectiveness of the peeling.

How to use

• **Professional use:** Using a cotton or a gauze, apply all over the face by dragging movements. Leave it on until it gets dry without removing the product.

Equipment

Not suitable for devices.

Frequency of use

• **Professional use:** Apply whenever it is required for the peeling.

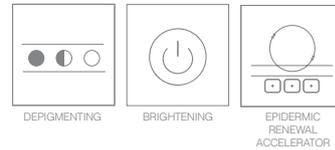

Precautions

Have not been described.

Technical sheet

Product SHINING LINE COMBINED PEEL
2. Whitening Peel

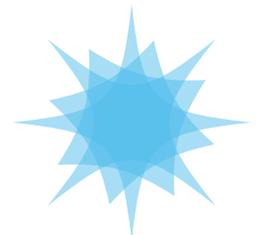

Format

8u. x 3 ml.

Description Whitening, depigmenting and shining peeling

Reference 15150003 (COMBINED PEEL CABIN PACK)

Main active ingredients

Azelaic Acid	Azelaic acid is found naturally in wheat, barley and rye. Presents antibacterial and antikeranizing activity, being active against Propionibacterium acnes and regulating the process of proliferation and differentiation of keratinocytes. Its topical action is effective in the treatment of various pigmentation disorders such as chloasma, toxic melanoderma, lentigo, due to its inhibitory action of the tyrosinase enzyme, acting competitively. This enzyme is responsible for transforming the natural substrates of tyrosine and DOPA into melanin. It is not metabolized, so no decomposition products are formed.
Salicylic Acid	Keratolytic agent that acts upon the removal of dead cells in the stratum corneum, reducing the corneocitary cohesion and inducing rejection of dead skin cells. Currently, it is accepted that the exfoliating action of salicylic acid undergoes decementation action (dissolution of the intercellular cement) and inhibition of cholesterol sulfotransferase activity. Salicylic acid also reduces the pH of the stratum corneum thus increasing skin hydration and favoring its keratolytic activity.
Citric Acid	Natural acid extracted from citrus fruits. Mild oxidant of organic substance that gives an immediate whitening effect.
Kojic Acid	Kojic acid is extracted from a Japanese mushroom called Koji and currently is one of the leading and more efficient actives used to treat pigmentation problems. Its powerful whitening action comes determined by its ability to inhibit the activity of tyrosinase enzyme during the production process of melanin. This ingredient is not photosensitive, so it does not stain the skin if exposed to the sun, and is not toxic at cellular level (like in the case of other whitening products), so it avoids possible stains.
Uva Ursi Extract (Arbutin, gayuba)	Arbutin is a hydroquinone derivative known for its skin lightening properties. This active effectively inhibits the activity of tyrosinase, the enzyme responsible for catalyzing the production of melanin in the skin.

Specifications

PARABEN FREE / MINERAL OILS FREE

Skin type	Results
Indicated for skins that require blemishes treatment, hyperpigmentations, enlightening the skin, and as a renovator. Very suitable for acne treatments.	Because of its depigmenting properties, visibly improves hyperpigmentation of melanic origin. Thanks to its effect at dermal level, it provides an immediate whitening effect and improves skin texture. Excellent action in antiacne treatments, thanks to its antibacterial and antikeratinizing action.

How to use	Equipment	Frequency of use	Precautions
<ul style="list-style-type: none"> Professional use: Apply using a fan brush to face, neck and neckline. Application time: see table on next page. Neutralize with Whitening Off Peel. 	Not suitable for devices.	<ul style="list-style-type: none"> Professional use: In the cabin treatment, or whenever required by the professional. See table of frequency of use in product box. 	Not recommended for extremely sensitive skin. Do not use during pregnancy and lactation. Avoid the eye contour area, lips and nostrils. Do not use other exfoliating products or dermabrasion.

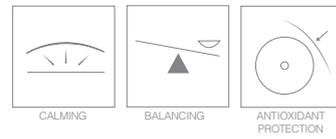

* Table according skin type:

Product SHINING LINE COMBINED PEEL
3. Whitening Off Peel

Format

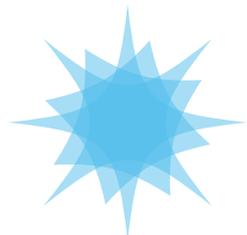

20 ml.

Description Neutralising and calming gel

Reference

15150003 (COMBINED PEEL CABIN PACK)

Main active ingredients

Glycolic Hamamelis Extract Hamamelis glycolic extract (from which its hydrosoluble extract is extracted by the method of dissolution), refreshes the skin and helps stimulate circulation. Thanks to its moisturizing and anti-inflammatory properties, its use is very common to soothe and restore the hydrolipidic mantle. It is also an excellent antioxidant.

Retinol Palmitate At low concentrations, Vitamin A has a soothing and decongestant effect at superficial level. Eliminates redness and provides moisturising.

Specifications MINERAL OILS FREE

Skin type	Results
Indicated for skins that require cool, calm and soothe redness immediately.	After the use of peeling, the buffering gel provides an immediate freshness, calms the skin and restores its pH, rebuilding the hydrolipidic mantle. Partially neutralizes, if it is necessary, the effect of the peeling in a specific area, avoiding an overexposure in more sensitive areas.

How to use	Equipment	Frequency of use	Precautions
<ul style="list-style-type: none"> In order to neutralise the peeling, apply a small amount of product, about the size of a hazelnut, and spread it with the hands, making sure that all areas, where previously we applied SHINING LINE PEEL, are being worked. Work for 1 minute approximately. Remove with water. 	Not suitable for devices.	<ul style="list-style-type: none"> Professional use: In the cabin treatment, or whenever required by the professional, in order to neutralize the action of the peeling. 	Have not been described.
